INJECTION IS A MEDICAL PROCEDURE WHICH REQUIRES EXPERIENCE AND EXPERTISE: ASK YOUR SPECIALIST (COSMETIC SURGEON, DERMATOLOGIST, SPECIALLY TRAINED PHYSICIAN).

Medical Devices Class III, regulated health products bearing the CE marking (CE 0344) in accordance with Medical Device Regulation

HYALURONIC ACID, TO FILL WRINKLES

Hyaluronic acid is a key component of the skin structure ⁽¹⁾ which plays a vital role in maintaining skin moisture and elasticity, as well as tissue cohesion.

As the years go by, collagen production and the amount of hyaluronic acid naturally present in the dermis begin to decrease.

The skin loses its firmness and elasticity and becomes visibly drier, resulting in more noticeable expression lines (crow's feet, frown and forehead lines) associated with the first signs of sagging (hooded eyes, lip wrinkles, loss of definition of the facial contour) and incipient loss of subcutaneous fat tissue (dark circles, tear trough, accentuation of nasolabial folds).

Various **STYLAGE**[®] treatments are available to reduce visible signs of skin ageing ⁽²⁾.

*Laboratoires VIVACY (France), specialists in Aesthetic Medicine with more than 15 years of experience in the field, have developed **STYLAGE**[®], a comprehensive range of resorbable fillers formulated with stabilised hyaluronic acid using patented IPN-Like technology and mannitol, an antioxidant.*

STYLE YOUR AGE !

SMOOTH AND FILL WRINKLES

Injection of **STYLAGE®** hyaluronic acid gel fills wrinkles and visibly smooths the surface of the skin.

The **STYLAGE®** range comprises different formulas designed for the treatment of all types of wrinkles, from superficial to deep.

Your doctor will recommend the most appropriate option for you (**STYLAGE® S, M or L**) based on the depth of the lines and the thickness of your skin.

- **STYLAGE® S**: for fine (superficial to moderate) lines.
- **STYLAGE® M**: for moderate to deep lines.
- **STYLAGE® L**: for deep to very deep lines.

LIP CORRECTION

STYLAGE® Special Lips is specially designed to treat all indications related to ageing of the lips. Adds volume to your pout and redefines the lip contour. **STYLAGE®** products are also available with added lidocaine, a local anaesthetic.

WHAT DOES THE PROCEDURE INVOLVE?

STYLAGE[®] injections are performed in medical settings by a qualified physician with good anatomical knowledge and trained to administer hyaluronic acid injections.

Your doctor will draw up a treatment plan tailored to your personal needs. Regular touch-ups will help maintain the desired correction.
