INJECTION IS A MEDICAL PROCEDURE WHICH REQUIRES EXPERIENCE AND EXPERTISE: ASK YOUR SPECIALIST (COSMETIC SURGEON, DERMATOLOGIST, SPECIALLY TRAINED PHYSICIAN).

Medical Devices Class III, regulated health products bearing the CE marking (CE 0344) in accordance with Medical Device Regulation.

BEAUTY AT ANY AGE

The changes in hormones that women experience around the age of 50 speed up the ageing process of the skin. Adopting the right habits helps maintain the natural beauty of the skin in an effective and lasting manner.

The skin also suffers the consequences of decreased hormone production and changes that affect the entire body and speed up the ageing process, with increasingly visible wrinkles and dryness causing sagging and loss of firmness. Some areas such as the cheekbones, temples, chin and the contour of the face are particularly affected⁽¹⁾.

*Laboratoires VIVACY (France), specialists in Aesthetic Medicine with more than 15 years of experience in the field, have developed **STYLAGE**[®], a comprehensive range of resorbable fillers formulated with cross-linked hyaluronic acid using patented IPN-Like technology and mannitol.*

HYALURONIC ACID FOR VOLUME

Hyaluronic acid is a key component of the skin structure ⁽²⁾. As years go by and depending on each individual, the amount of hyaluronic acid naturally present in the dermis begins to decrease, the skin loses its plumpness and lines start to appear.

STYLAGE® XL and **XXL** hyaluronic acid gels restore the contours of the face by replenishing volumes that are lost over time.

- **STYLAGE® XL** for facial volume restoration or augmentation (cheeks, facial contour, etc.).
- **STYLAGE® XL** is also available with added lidocaine, a local anaesthetic.
- **STYLAGE® XXL** for facial volume restoration or augmentation (cheeks, contour, etc.).

HARMONIOUS RESTORATION OF FACIAL CONTOURS

Injection of **STYLAGE® XL** and **STYLAGE® XXL** high density hyaluronic acid “volumizers” into the deep dermis or subcutaneous tissues restores fullness, balance and harmony to the face and tightens sagging skin.

WHAT DOES THE PROCEDURE INVOLVE?

STYLAGE® injections are performed in medical settings by a qualified physician with good anatomical knowledge and trained to administer hyaluronic acid injections.

Your doctor will draw up a treatment plan tailored to your personal needs. Regular touch-ups will help maintain the desired correction.
